

International Foundation Year 120 Credits.

With great pleasure, we confirm that Global Education Hub has been fully accredited by the London Management Qualifications, UK to offer its Level 3 International Foundation Year One programme. This accreditation is a testament to the high-quality education and training that our institution provides to our students.

As part of the programme, students will be registered at grade 12 while they are completing their high school diploma. This allows them to gain a comprehensive understanding of the subject matter and prepares them for further education in particular to a first university admission and career opportunities.

The subject list students will complete as part of the programme is attached below for your reference. The list includes a diverse range of subjects that will provide students with a well-rounded education and the skills they need to succeed in today's globalized world.

We are committed to providing our students with the highest standard of education and are confident that this programme will prepare them for success in their future endeavours.
